

VACAGENT

vacation rentals professionals

Case study by DevPals AB

valerie@devpals.se | +46 766921856

VacAgent Vision and Mission

VacAgent facilitates travel agents in finding professionally - managed vacation rentals faster, cheaper, and more efficiently by closing the demand-supply gap.

We connect property management businesses and travel agencies through a technologically advanced multi-functional platform.

Problem: Definition

Existing solutions do not meet the growing vacation rental industry needs.

Lack of Trust

Customers are at risk of booking a vacation rental that is either fake or fraudulent

Travelers can rely on agents or booking systems and travel with confidence because VacAgent ensures that the rentals are genuine and verified

Lack of Supply

Single property management companies are unable to meet all demand, particularly during peak seasons

VacAgent provides an access to wide range of rentals and ensures their availability

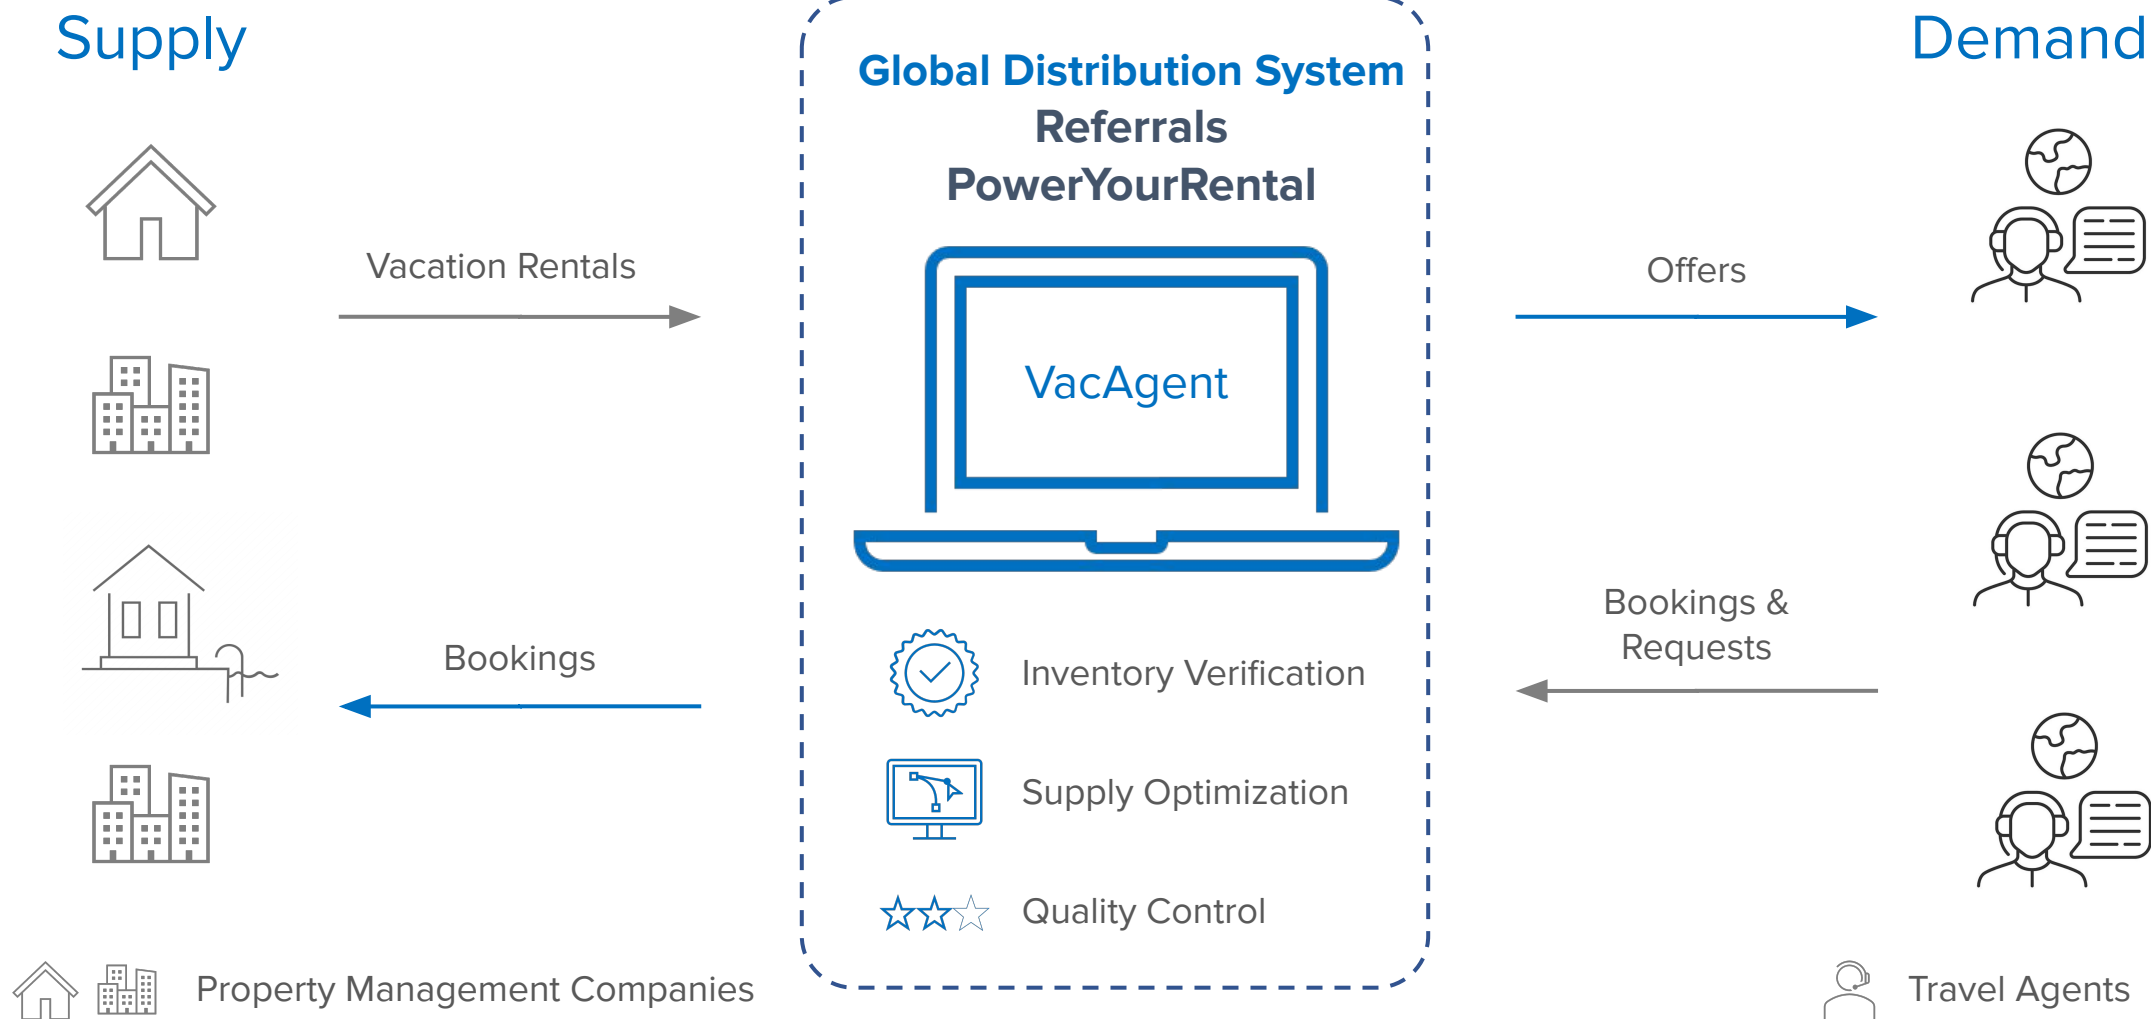

Lack of Standards

Many existing vacation rental providers don't meet rising customer service expectations

VacAgent keeps agents and property managers up to date on all available options and allows them to select the best one

VacAgent Solution

VacAgent Portfolio

Global Distribution System

Clients: Property providers, platforms, big & small travel agencies

Value Proposition: Core solution - B2B system with API integration providing inventory for VacAgent distribution partners.

PowerYourRental

Clients: small travel companies and private property owners

Value Proposition: Customized Solution for Property Management companies who has no front-end (website, app, etc.). Power Yor Rentals helps to facilitate more flawless bookings process and online presence.

Referrals Platform

Clients: B2B suppliers and providers

Value Proposition: A technologically advanced solution solving the problem of overbookings and turned-away guests.
